TENCEL® The Eco-Fiber, is extracted from eucalyptus wood originating entirely from sustainable forest plantations, and the most environmentally friendly man-made cellulosic fibre available today. In eco terms, eucalyptus is an interesting raw material since it grows rapidly and does not need artificial irrigation or gene manipulation. An important asset is that the fiber yield with TENCEL® is ten times higher than with conventional cotton.

## LENZING TENCEL 100 % & BLENDS
